01 ARSENAL

Tech Stack

HTML5 · CSS3 · JavaScript ES6+ · TypeScript · React.js · Next.js · i18n

State Management

React Hooks · Redux · Redux Toolkit · Context API · TanStack Query · Jotai · Zustand

UI & Styling

Tailwind CSS · Material UI · Bootstrap · Sass (SCSS) · LESS

Testing & TDD

Jest · React Testing Library · React Hook Form · Zod · Storybook · Postman

Performance & A11y

WCAG · Lighthouse · Web Vitals · Cross-Browser · A11y Testing

Tools & Analytics

Git & GitHub · NPM / Vite · Chrome DevTools · VS Code · GA4

AI Coding Tools

Claude · Claude Code · GitHub Copilot · ChatGPT · Gemini

02 Profile

Frontend Developer with **~5 years of experience** architecting, scaling, and testing high-performance enterprise web applications using **React.js** and modern JavaScript (ES6+). Builds clean, reusable component systems, optimizes rendering performance, and ships **data-dense dashboards** and interactive **Google Maps** experiences used across large-scale business operations. Comfortable across the stack with working exposure to **Next.js API Routes** and **MongoDB**. An **AI-augmented developer** who uses modern AI tools daily to accelerate delivery and raise code quality, partnering with backend developers, UI/UX designers, QA, and stakeholders across the full product lifecycle.

03 Experience

ANRX Solutions

OCT 2021 – AUG 2026

FRONTEND DEVELOPER

- Developed and tested **enterprise-grade React.js applications** and business-critical dashboards handling large-scale operational datasets, creating reusable components and building new features end-to-end from design through QA.
- Developed scalable application state using **Redux, Redux Toolkit, and the Context API**, and integrated **REST APIs** to support dynamic, data-driven UI functionality — identifying and fixing bugs through debugging and refactoring.
- Built **high-density, performance-optimized React data tables** with nested rows, server-driven search, advanced filtering, custom sorting, and pagination — leveraging memoization to keep large datasets fast and responsive.
- Implemented charts and **Google Analytics 4 (GA4)** tracking within React components for user interactions, custom events, downloads, and engagement metrics, enabling data-driven product decisions.
- Built interactive, high-performance geospatial interfaces with the **Google Maps JavaScript API** — integrating marker clustering, feature layers, and polygon & boundary rendering with geocoding to visualize thousands of location points.
- Engineered a **real-time notification component using WebSockets**, implementing resilient leader-election to auto-reassign the active connection on disconnect, ensuring duplicate-free live updates.
- Converted **Figma** designs into pixel-perfect, responsive components with clear technical documentation.
- Collaborated cross-functionally with backend developers, designers, and QA within an **Agile/Scrum workflow** — participating in sprint planning, and Git-based version control to uphold engineering development standards.
- Adopted an **AI-augmented development approach**, using AI-assisted tools and agentic workflows to accelerate feature delivery.

Tech Exposure

Vue.js | Next.js API Routes | Node.js | Express.js | MongoDB | Mongoose

06 EDUCATION

ONGOING

B.Tech in Computer Science & Engineering

PKG Group of Institutions, Panipat, Haryana

2019

Diploma in Computer Science & Engineering

Government Polytechnic, Sonepat, Haryana

2016

Secondary School (10th), CBSE

I.B.(L) Public School, Panipat, Haryana

07 LANGUAGES

Hindi

Native / Full Professional

English

Professional Working

08 STRENGTHS

- Ownership Mindset
- Strong Work Ethic
- Disciplined
- Active Listener
- Problem Solver
- Fast Learner

04 Independent Build

Alec EV & Hybrid Battery Services

MAY 2026 – JUN 2026

0→1 BUILD · INDEPENDENT PROJECT · ALECEVHYBRID.COM

- Built and deployed a **production-ready business website** using **Next.js, TypeScript, and Tailwind CSS**, delivering a responsive, modern, and SEO-optimized experience.
- Owned the **end-to-end development lifecycle**, collaborating directly with the client to transform business requirements into production-ready features.
- Implemented **technical SEO** (schema, sitemap, robots.txt, canonical URLs, metadata, Core Web Vitals) and integrated **Google Search Console, GA4, Google Ads Conversion Tracking, and Google Maps**.
- Developed conversion-focused features including **WhatsApp lead generation**, optimized contact forms, interactive maps, and click-to-call actions.
- Managed deployment, domain configuration (Namecheap), and automated **Vercel CI/CD**, ensuring reliable production releases and ongoing maintenance.
- Used AI-assisted development workflows and agentic tools (Claude, ChatGPT, Gemini) to accelerate delivery and iteration speed without compromising code quality.

05 Core Competencies

// 01

Ownership & Accountability

Owns features from design through testing — going beyond the assigned ticket to catch bugs and edge cases early.

// 02

Cross-Functional Collaboration

Works directly with Product, Design, Backend and QA to turn ambiguous requirements into shipped, reliable features.

// 03

Self-Driven Execution

Delivered an independent project solo, end-to-end — direction, development, and deployment infrastructure.

// 04

Usability & Craft

A strong sense for usability and visual aesthetics, paired with hands-on use of AI agents and agentic workflows to ship faster without cutting corners.

See the work in motion — explore the full portfolio.
